IMPROVE THE OVERALL HEALTH OF RESIDENTS BEAUTIFY THE COMMUNITY ENVIRONMENT

The park would involve age-neutral 360-degree Flipbook x Zoetrope device, fitness equipment, thermal sensitive paving, landscaping, colourful shading and seating. For the design for the device, the 360-degree Flipbook x Zoetrope devices range from different radiuses and heights, and can be scattered around the site as they reveal stories of Yau Ma Tei to visitors. Both flipbooks and zoetrope were the first-generation devices for animations, in which they turn a series of still images into animated films. The rotations of the device are connected to a series of age-neutral fitness equipment next to them. As one act on the equipment, the device starts to rotate, reveal the content and form a feedback system to users. Since the content in the device is 360 degrees, the views of both users and others change at the same time, which contributes to an everchanging landscape. The device does not only benefit the users, but also pedestrians who walk through the park. The content of our device can be changeable and context-specific, which allows visitors to discover the unobvious in Yau Ma Tei. On top of the Flipbook x Zoetrope design, other feedback systems are designed on-site. Our design features colourful round shading devices which can optimise the micro-climate on-site as they provide shelter and respite visitors from the sun. The shading devices also cast shades at different colours and sizes throughout a day. For the landscape design, the floor of the playground is colorful, stylish, avant-garde, and has guiding lines and patterns. The colors are mainly bright ones, including red, blue, purple and yellow, creating a vibrant atmosphere.

增強體魄健康 • 美化社區環境 • 鼓勵長幼共融

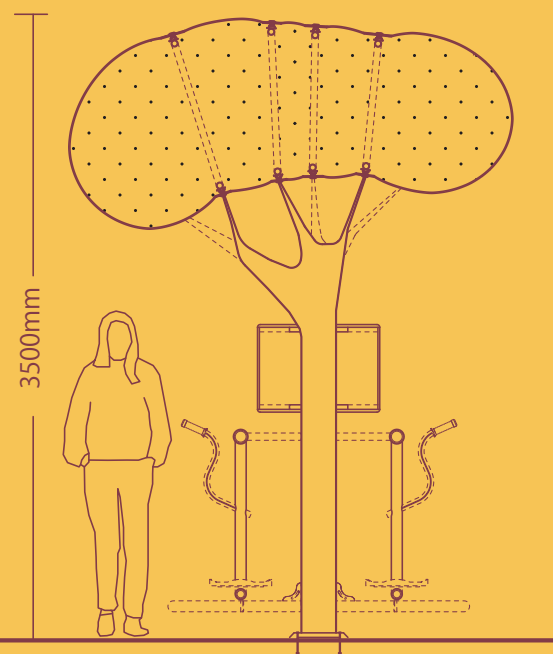

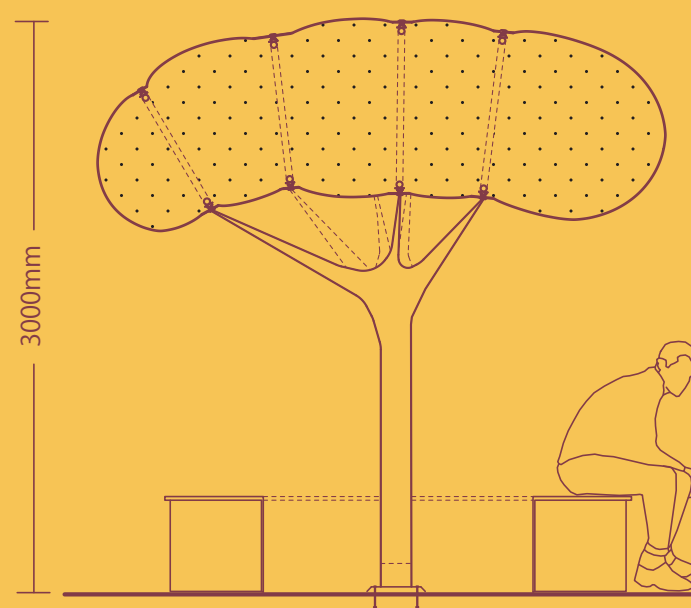

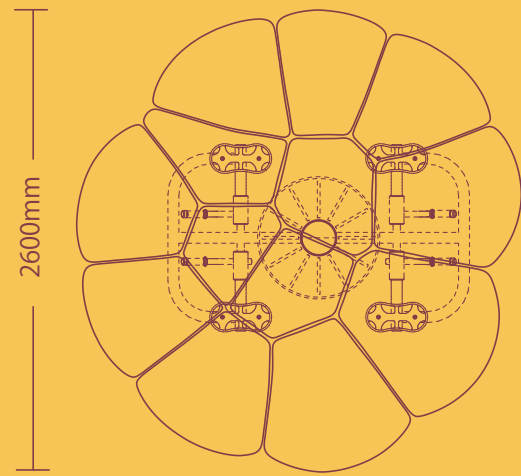

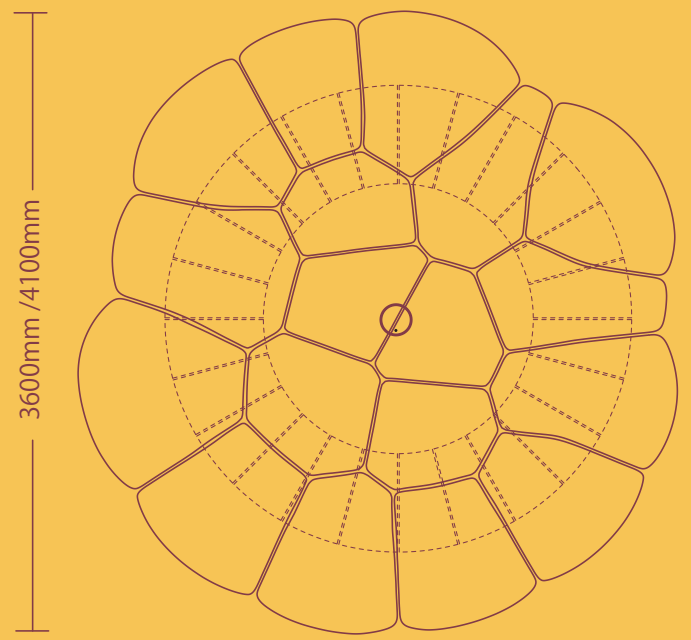

該公園將適合所有年齡的360度翻頁動畫設備，健身設備，熱能感應鋪路，美化環境，色彩斑斕的圖案和座椅帶到社區。對於設備的設計，不同類型的360度翻頁動畫設備的半徑和高度不同，並且可以在站點周圍散佈，向遊客展示了油麻地的故事。翻頁動畫設備都是用於動畫的第一代設備，它們將一系列靜止圖像轉換為動畫電影。該設備的旋轉裝置與旁邊的一系列適合所有年齡的健身設備相連。隨著對設備的使用，設備開始旋轉，顯示內容並向使用者建立互動關係。由於設備中的內容是360度，因此使用者和其他人的視覺會同時被吸引，這有助於創造不斷變化的景觀。該設備不僅使使用者受益，而且吸引公園的行人。我們設備的內容可以更改，包含油麻地的不同文化和歷史元素，從而使使用者可以了解油麻地不同的事物。除了翻頁動畫設備的設計，公園設計還包括其他互動系統。我們的設計採用了彩色的圓形遮陽設備，可以在現場優化微氣候，因為它們為陽光提供庇護和休息的遊客。遮光設備還可以在一天中以不同的顏色和尺寸投射陰影。對於景觀設計，運動場的地板色彩鮮豔，時尚，前衛，並具有引導線和圖案。顏色主要是明亮的顏色，包括紅色，藍色，紫色和黃色，營造出鮮明的氛圍。
